FACTS

- 505 people lost their lives, 76 people remained missing, and 1,777 people were injured in 3,904 disaster incidents between April 2021 and April 2022. Total damage was estimated at USD 22.3 million.
- Besides the prevalent water-induced disasters, earthquake is another major hazards.

KEY INTERVENTIONS

Participatory disaster risk assessment

Assess household-level vulnerability in the aspects of exposure, sensitivity and capacities. Household disaster preparedness plans are then developed based on the information provided by the respective individual households.

School safety plan & school improvement plan

Support school management committees in developing and implementing plans to address disaster issues, which also benefits students and teachers as they understand the issues they may face and the mitigation measure that could be applied

Prepositioning non-food items

Distribute prepositioned items to meet the basic needs of disaster-affected families, including shelter, in order to help them recover and build resilience

Ward-level local disaster climate resilient plan

Support local governments in strengthening local capacity for disaster risk reduction and climate change adaptation initiatives through consultative disaster climate resilient plan

As a humanitarian and development organisation, World Vision International - Nepal contributes to enhancing the capacity of local government in disaster governance, disaster risk reduction, and climate-smart agriculture. We are committed to strengthening the resilience of the communities and the children we are working with.

NOTABLE PROJECTS

Household disaster preparedness

Help the most vulnerable households understand their disaster-related vulnerabilities and develop disaster preparedness plans and activities. Promote the mainstreaming and scaling up of household-level preparedness into the annual municipal development plans

- > **Timeline:** September 2020 – September 2021
- > **Budget:** USD 90,118
- > **Reach:** 10,985 beneficiaries

Nepal disaster risk reduction

Equip communities to respond effectively to disasters through functioning local disaster risk management systems

- > **Timeline:** October 2018 – March 2021
- > **Budget:** USD 1,111,945
- > **Reach:** 116,000 beneficiaries

Nepal flood response & recovery

Enable flood and landslide-affected families to have diversified sources of livelihoods to improve resilience to shocks and stresses through cash-based program

- > **Timeline:** September 2019 – March 2020
- > **Budget:** USD 344,933
- > **Reach:** 26,240 beneficiaries

Community and school disaster preparedness and resilience in Doti district

*Ensure school facilities resilient to various kinds of disasters
Institutionalise risk reduction and resilience education*

- > **Timeline:** January 2017 – January 2019
- > **Budget:** USD 858,549
- > **Reach:** 24,025 beneficiaries
